

Jupiter's at the Crossing

Champaign, Illinois

Owner: Carlos & Marco Nieto and Tifani Moot
Architect: Gorski Reifsteck Architects, Champaign, IL
Contractor: Sunbuilt Homes, Champaign, IL

Range of Services

- Schematic design; design development
- Construction documents; construction administration and observation

Project Overview

Jupiter's is a large scale restaurant/bar with three levels covering 26,000 square feet providing space for billiards and small-scale bowling among its many games, plus 4000 square feet of two-level outdoor beer garden.

This is a steel framed two story building plus basement, unfilled with wood trusses for the first and second floors. The gable roof form with dormers is created with a wide variety of wood trusses. Plywood wall sheathing was used over the wood stud framing to create lateral load shear walls.
